Special Cut
 Random Sq Cut - rsc (slate only)

Venetian Inlay

Random Sq Cut

Pedestals

Original Edge Frame

Hearth Pads sizes up to 48" x 54" with R-Value of 2.24

- 1" frame
- 30% lighter than other hearth pads
- Single ½" noncombustible substrate with significantly higher R-Value than other substrates

Hearth Pads sizes 54" or larger with R-Value of 1.592

- 1-1/4" frame
- Two substrates equal to ¾", these substrates provide a slightly lower R-Value than the single substrate in our 1" frame
- Two substrates are required to provide strength for larger hearth pads

Colonial Edge Frame

Hearth Pads all sizes with R-Value of 1.592

- 1-1/4" frame
- Utilized two substrates equal to ¾", these substrates provide a slightly lower R-Value than the single substrate in our 1" frame
- Two substrates are required to provide strength for larger hearth pads

All Sizes of Hearth Pads

- Extruded, tubed aluminum for maximum strength
- Corner plugs to ensure perfectly "square" hearth pads every time
- Powder-coated
- No overspray issues on tile/grout, frame powder coated prior to tile/slate installation so grout and thin set clean off frame easily
- Both substrates provide excellent tile bonding characteristics, unlike substrates found in other brands of hearth pads
- Does not rely on air pockets for thermal value
